Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1-16 and 70, drawn to encoding video image with a switch code and coding of the switch code and motion information of Fig 10-14.

Group II, Claims 17-29, drawn to coding by a particular order where blocks are in specific locations.

Group III, Claims 30-37, drawn to the coding of hybrid motion vector of Fig 25.

Group IV, Claims 38-43, drawn to different resolution and filter modes of Fig 26.

Group V, Claims 44-47, drawn to coding different component values of Fig 26.

Group VI, Claims 48-69, drawn to decoding of video image of Fig 9.

Conclusion

The inventions listed as Groups I-VI do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding technical features for the following reasons: the special technical feature of the Group I is the switch code and coding of the switch code and motion vector

information while Group II invention is the coding of coding blocks in specific locations while Group III invention is the coding of hybrid motion vectors while Group IV requires different resolution and filter modes while Group V is the coding of different component values, and Group VI requires decoding. Since the special technical feature of the Group I invention is not present in the Groups II-VI, Group II invention is not present in the Groups I, III-VI, Group III invention is not present in the Groups I-II and IV-VI, Group IV invention is not present in the Groups I-III and V-VI, Group V invention is not present in the Groups I-IV and VI, and Group VI invention is not present in the Groups I-V, unity of invention is lacking.
